PERSONAL PROJECTS

Ecommerce Website - Backend Design (01/2024 - 02/2024)

- Developed the complete backend for an e-commerce website using Node.js, Express, and MongoDB. Designed and implemented a robust RESTful API to enable seamless communication between frontend and backend components. Created and optimized MongoDB schemas to ensure efficient data storage, retrieval, and scalability.
- Tech Stack - mongodb, postman api, nodejs, express.js

Bank App - UI design (06/2023 - 07/2023)

- Designed a modern, user-friendly interface for a banking application, focusing on seamless user experience with zero page reload delays. Utilized responsive design principles to ensure smooth interaction and accessibility across devices.
- Built using the React build, Tailwind CSS and Bootstrap.
- Responsive and SEO friendly.

Shopping App - Ui Design (07/2022 - 08/2022)

- Designed a fully responsive e-commerce website with 100% pixel-perfect accuracy using HTML, CSS, and JavaScript, ensuring visual consistency and high-quality user experience across all devices.
- Ensured fast loading times and smooth user interactions by writing efficient, modular, and maintainable JavaScript code.
- The design is responsive, so it adapts to different screen sizes and devices. Used CSS media queries for adaptive display of the web application.

Mardia Website - Landing page (05/2022 - 06/2022)

- Designed a user friendly , responsive Landing page for the mardia steel company using HTML CSS and javascript
- Designed the app by writing clear and understandable code in javascript.Optimized it for speed and efficiency.
- Integrated high-quality images, videos, and graphics to create visually engaging content that aligns with brand identity and effectively supports storytelling and messaging.
